

## Aqua Vida Foot Spa System

**Description of Service:** The AquaVida® system is a non-invasive, simple to use foot spa that uses a special, high-tech array which emits a bio-energetic resonance into clean water that then passes through your body. The AquaVida® array provides stimulation to increase metabolic efficiency. The tiny ducts of the eccrine glands allow a solution of salts, organic compounds, and metabolic wastes to empty directly to the surface of the skin. This resynchronization is believed to release toxins so they can flow into the blood and be removed by natural urinary, gastrointestinal, and lymphatic action. **The AquaVida® foot spa does not cure anything.** The session is performed by immersing your feet in warm water and relaxing for 30 minutes while the machine completes its cycle. The machine is fully automated. **(please complete and sign)**

There are no known adverse side effects from using this machine, but **not all people are suited for it.** It is not recommended for anyone with an irregular heartbeat, organ transplant, seizures/epilepsy, pregnancy, open wounds on the feet, or advanced stage of diabetes. \*Not recommended for children under the age of 5

### Health Questions

Please answer the following questions to make sure it is safe for you to use the **AQUAVIDA System.** AQUAVIDA does not recommend a foot spa session for the following conditions:
